PROJECT MANAGER

My task was to help with the opening of a new manufacturing plant in Mexico for Czech company mmcité which fabricates street furniture. I was responsible for fabrication to bring everything to European standards. After 3 years we built and stabilized a capable team of local employees. Significantly increased the number of suppliers, what resulted in better prices and quality. The branch became self-sufficient and manages to cover all orders from Mexican market and part of orders from USA market.

HEAD OF PRODUCTION

Company engaged in custom metal production, mainly from stainless steel. My responsibility was to take care of the order from demand, through production, to handing over the work to the customer. I was negotiating with customers and suppliers. I created drawing documentation, production processes or production schedules. It was a great experience be part of the production process from start to finish.
